

SPECIFICATION GUIDE FOR WAREHOUSES & DISTRIBUTION CENTRES

PREMIUM ENTRANCE MATTING SYSTEMS

First impressions last

GEGGUS[®]

SPECIFYING THE MOST APPROPRIATE ENTRANCE MATTING SYSTEM

Entrance matting systems are both an aesthetic and a safety product, playing a crucial role in removing dirt and moisture from footfall traffic and wheels. This important function improves public safety in buildings by:

- › Helping to prevent slips and trips
- › Prolonging the life of surrounding floor finishes
- › Improving hygiene levels
- › Reducing cleaning requirements

THE 'TOP CLEAN®' ENTRANCE MATTING RANGE FROM GEGGUS

Entrance matting systems not only have to perform by keeping an area clean and safe, but they also have to complement the overall look and feel of an entrance area. GEGGUS TOP CLEAN® aluminium entrance mats perform all these tasks effortlessly.

They effectively capture dirt and moisture within a matwell recess to provide a safe and effective barrier, helping to reduce the risk of slips, trips, and falls - while enhancing the overall aesthetics of their surroundings. In doing this, aluminium matting systems also help keep cleaning and maintenance costs down, ensuring that reception areas and internal floors always look at their best.

WHERE ARE ENTRANCE MATTING SYSTEMS USED?

With the right specification, an effective entrance matting system can help to achieve a substantial reduction in the quantities of dirt and moisture that get into a building. Entrance mats minimise the danger of slipping on wet floors and reduce regular cleaning costs.

Entrance mats are not only used in entrances and other places of access to a building. With a wide range of mat combinations, they are also effective in other areas where particularly large quantities of dirt are to be found. This diagram illustrates how our diverse range of entrance matting systems can be put to good use in a building.

GEGGUS ENTRANCE MATTING SYSTEMS PROVIDE THE PERFECT SOLUTION FOR INTENSELY TRAFFICKED AREAS IN INDUSTRIAL ENVIRONMENTS.

With a range of options to suit every application and environment, our bespoke warehouse and distribution centre aluminium entrance matting systems are perfect for very heavily trafficked areas.

Able to withstand heavy footfall, forklift, pallet truck and even light weight vehicle movements, Geggus matting systems keep floors clean and free from dirt and moisture to deliver slip- and trip-free surfaces.

GEGGUS Top Clean entrance mats come with a ten year, product, and material defect warranty, providing assurance to the longevity of our entrance matting systems.

INDOOR

FOR WAREHOUSES & DISTRIBUTION CENTRES TOP CLEAN OBJEKT

The Ultimate Solution: for warehouses and distribution centres that experience high daily footfalls, we recommend specifying our pallet truck and fork lift truck passable: Top Clean OBJEKT with Ribbed Carpet for indoor use, to keep floors free from dirt, grease and moisture.

Ribbed Carpet (UV-resistant heavy duty polypropylene), available in the following colours:

FOR SYSTEMATIC PROTECTION. ASSURED VALUE FOR MONEY.

Our 3-zone solution takes dirt collection to a new dimension. With a universal design, our entrance matting systems work seamlessly together, enabling a complete 'through solution' to be created from outside to indoors, to provide a series of individual 'clean-off' zones.

Step by Step: Our profile inlays with combinations of materials ensure that moisture and coarse dirt are reliably removed from shoe soles and not carried further indoors – before people actually enter the building and specifically in frequently used entrance areas.

We also take a systematic approach to the issue of safety. Protection against moisture and dirt, together with the anti-slip function, lead to a lasting reduction in the risk of accidents and ensure greater safety.

THREE CLEAN-OFF ZONES. COMBINED IN A SINGLE SOLUTION.

ZONE 1
See **GOLD STANDARD Outdoor** (Page 5)

OUTDOOR AREA

Absorption of coarse dirt:
Removal of dirt before entering the building

Effect:
Increased effectiveness of subsequent entrance mats

Advantage:
Protection against coarse dirt and moisture

PRODUCTS:
Matting systems for outdoor areas

ZONE 2

INTERMEDIATE ZONE

Frequently used entrance areas:
Efficient removal of even large quantities of dirt

Effect:
Reinforced protection function in combination with zone 1 entrance mats

Advantage:
Protection against coarse dirt and moisture

PRODUCTS:
Matting systems for indoor areas
Matting systems for outdoor areas

ZONE 1
See **GOLD STANDARD Indoor** (Page 5)

INDOOR AREA

Absorption of fine dirt:
Reliable protection against fine dirt particles and residual moisture

Effect:
Lasting absorption of persistent dirt and moisture

Advantage:
Additionally reduces dirt and moisture, and stops it being carried into the building

PRODUCTS:
Matting systems for indoor areas

THE ADVANTAGES AT A GLANCE:

- Substantial reduction of dirt ingress
- Clear decrease in cleaning costs
- Protection of adjoining floors
- Long-term preservation of the building's value
